HOW TO USE THIS PRICING GUIDE

All pricing is for single units, not pairs. All pulls may be Surface (S), Thru-Bolted (TB) or Back to Back (BTB) mounted on Wood (W), Metal (M), Composite (C) or Glass (G) doors. We require that the mounting along with the door type and thickness be included in your order. Refer to the Mounting Guide detail page for additional information on the mounting options available.

Back to Back Mounting charge per set is \$65. Thru-Bolt Mounting with Screw Cover charge per set is \$25

To place your order, please email all purchase orders to Orders@FirstImpressionsINT.com

DRILLING DETAILS
FOR GLASS DOOR
1/4-20 Bolt = 3/8" Hole
FOR WOOD & METAL DOOR
1/4-20 Bolt = 1/4" Hole
3/8-16 Bolt = 3/8" Hole

1 Prepare Door Height

Determine the vertical and horizontal handle position and draw a centerline using a level at desired distance from door edges.

A- Distance from the edge of door to center of mount.
B- Distance from bottom of door to center of first mount.

2 Prepare for Center-to-Center (CTC)

To measure product CTC exactly, measure from center of one hole to inside center of the other hole.

Mark CTC on door ensuring lines match CTC lines on Handle.

Repeat steps 1 & 2 on other side of door for back to back mounting.

3 Drill Holes

When drilling through door, start by drilling halfway through one side, then finish from opposite side. This ensures drilled hole is level and aligned.

4 Insert Bolts

Hold external handle against face of door, insert and then fasten bolt.

5 Bolt Installation

Hold external handle firmly against the face of door and screw in bolt.

Inside face of bolt should line up with the face of the door and should be screwed in loosely - do not tighten all the way.

6 Bolt Installation

If set screw is not inserted, insert into thread.

Slide handle onto bolt heads and hold firmly against door face.

Tighten set screw.
